

Dense Conveying System

Your Ultimate Solution for Efficient Material Handling

Delta Ducon's dense conveying systems offers the ultimate solution for efficient, reliable, and cost-effective material handling. Engineered to reduce wear on pipes and components, Our systems cut maintenance costs by up to 80% while delivering energy savings of 30-50% through optimized compressed air usage.

With reduced pipe wear and extended equipment life, these systems provide long-term durability using smaller, cost-efficient piping. The innovative Dome Valves ensures reliable performance across various industries, handling fine ash, coarse materials, and high-temperature substances with ease. MD Pumps and Ash Vessels can convey materials over 1000 meters with low energy consumption, offering unmatched versatility for industrial applications. Businesses gain operational excellence, lower costs, and enhanced system reliability.

Highlights:

- △ Superior Reliability
- △ Ceramic-lined bends for handling abrasive materials
- △ Efficient MD Pumps and Ash Vessels
